How it works

- The UMS 60 from TVI is a high-quality knife grinding machine that has been specially developed for professional use.
- It is characterized by its user-friendly handling, so that even people without extensive experience in knife sharpening can operate it without any problems.
- A special feature of the UMS 60 are the optimized format sets, which allow wear control for every type of TVI knife.
- These ensure extremely easy handling and repeatable grinding results, which leads to optimal portioning results.
- The machine is made from high-quality materials that guarantee durability and reliability.
- Overall, the UMS 60 from TVI is an excellent choice for anyone who values a simple yet efficient solution for perfect portioning results.
